DETAILED ACTION

Claim 16 has been omitted. Therefore claims 17-20 have been renumbered 16-19.

Election/Restrictions

Claims 3-5, 7, 18, and 19 withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 6. Claims 19 and 20 have structure to the non-elected inventions. Claim 2 is considered elected since the door moves vertically to open and close.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 2, 6, 8, 9, 10, 12, 15, 16, and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Rinkewich (US 4,432,591). Regarding claims 1 and 15, see Figs. 1-3, where the claimed structure is shown. 20 is the bottom floor, 16 is the left wall, 14 is the right wall, and 18 is the rear wall. The front wall 10 has the gap for

Art Unit: 3727

receiving the door. Regarding claim 2, the front door opens and closes vertically.

Regarding claim 6, the handle is 34. Regarding claims 8 and 9, see Fig. 1, where the at least one or plurality of wheels is shown. Regarding claim 10, the front door is a flexible sheet since its sections will allow for it to bend around the curved track in which the door resides. Moreover, the front door is plastic to some degree flexible.

Regarding claim 12, the locking mechanism is seen in Fig. 1 as 32, 33 and the mating part on the front wall 10 near 34. Regarding claim 16 and 17, see Fig. 1 where the structure is shown. The door is in the gap and the handle is below the door on the front wall.

Claims 1, 2, 6, and 8-17 are rejected under 35 U.S.C. 102(e) as being anticipated by Leess (US 6,318,579). Regarding claims 1 and 15, see Figs. 1-5, where the claimed structure is shown. The door fills the gap on the front wall below the rounded top.

Regarding claim 2, the door opens and closes vertically. Regarding claim 6, the handle is 18. Regarding claims 8 and 9, the wheels are shown in Fig. 1. Regarding claim 10, the door is a flexible sheet. Regarding claim 11, the front door has the handle 44.

Regarding claim 12, the locking mechanism is 58. Regarding claim 13, see Fig. 4. The door is plastic. Regarding claim 14, the cavity is shown in Fig. 4 that receives the door.

Regarding claims 16 and 17 see the discussions above.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3727

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 13 is rejected under 35 U.S.C. 103(a) as being unpatentable over Rinkewich. Regarding claim 13, Rinkewich teaches the door being made of plastic but does not teach the other components being made of plastic. Official notice is taken that it is well known to substitute plastic for metal. It would have been obvious to make all the components of plastic to provide a non-corroding cart.

Conclusion

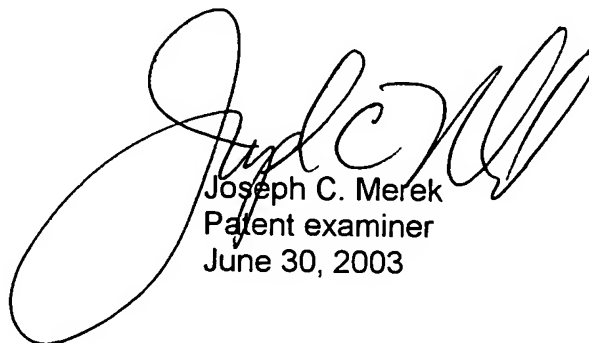

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Potter, Sills et al, Moulton et al, Derman, Blechmam, and Davison are all cite for teaching sliding doors.
